ELECTRIC VEHICLE MARKET

GLOBAL FORECAST TO 2035

REPORT BROCHURE WITH SAMPLE PAGES

REPORT CODE: AT 4907

INTRODUCTION

1.1 STUDY OBJECTIVES

- To segment and forecast the size of the electric vehicle market in terms of volume (thousand units) and value (USD million)
- To define, describe, and forecast the market by charging point type, propulsion, vehicle type, vehicle top speed, vehicle drive type, vehicle body type, vehicle connectivity, E/E architecture, end use, and region
- To analyze regional markets for growth trends, prospects, and their contribution to the overall market
 - To segment and forecast the market based on propulsion [(plug-in hybrid electric vehicle (PHEV), fuel cell electric vehicle (FCEV), battery electric vehicle (BEV), hybrid electric vehicle (HEV), and mild hybrid electric vehicle (MHEV)]
 - To segment and forecast the market based on vehicle type (passenger car and commercial vehicle)
 - To segment and forecast the plug-in EV market based on vehicle body type (SUV/MPV, sedan, and hatchback)
 - To segment and forecast the plug-in EV market based on vehicle top speed (<110 mph and >110 mph)
 - To segment and forecast the plug-in EV market based on vehicle drive type (front-wheel drive (FWD), rear-wheel drive (RWD), and all-wheel drive (AWD))
 - To segment and provide qualitative insights into the market based on vehicle connectivity (V2B or V2I, V2G, and V2V)
 - To segment and forecast the plug-in EV market based on E/E Architecture (400V and 800V)
 - To segment and forecast the hybrid-EV market based on Hybrid Configuration Type (Series, Parallel, Series-parallel)
 - To segment and provide qualitative insights into the market based on end use (private and commercial)
 - To segment and provide qualitative insights into the market based on MHEV Topology (P0, P1, P2, P3, P4))
 - To provide qualitative insights on EV components
 - To segment the market and forecast its size by volume based on region (Asia Pacific, Southeast Asia, Europe, North America, Latin America, Middle East, and Africa)
- To analyze the technological developments impacting the market
- To analyze opportunities for stakeholders and the competitive landscape for market leaders
- To provide detailed information regarding the major factors influencing market growth (drivers, challenges, restraints, and opportunities)
- To study the following concerning the market
 - Supply Chain Analysis
 - Ecosystem Analysis
 - Technology Analysis
 - Trade Analysis
 - Case Study Analysis
 - Patent Analysis
 - Regulatory Landscape

INTRODUCTION

- Pricing Analysis
 - Trends and Disruptions Impacting Customer Business
 - Impact of AI/Gen AI
 - Key Stakeholders and Buying Criteria
 - Key Conferences and Events
- To strategically analyze markets with respect to individual growth trends, future prospects, and contribution to the total market
 - To strategically profile key players and comprehensively analyze their market shares and core competencies
 - To track and analyze competitive developments such as product developments, deals, and other activities carried out by key industry participants

1.2 MARKET DEFINITION

An electric vehicle (EV) is an automobile propelled by one or more electric motors. An EV uses energy stored in rechargeable batteries, which can be charged using private or public charging infrastructure. There are five types of EVs considered under the scope: battery electric vehicles (BEVs), plug-in hybrid electric vehicles (PHEVs), hybrid electric vehicles (HEVs), mild hybrid electric vehicles (MHEVs), and fuel cell electric vehicles (FCEVs).

INTRODUCTION

1.3 STUDY SCOPE

1.3.1 MARKETS COVERED AND REGIONAL SCOPE

FIGURE 1 ELECTRIC VEHICLE MARKET SEGMENTATION AND REGIONAL SCOPE

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

INTRODUCTION

1.3.2 YEARS CONSIDERED

Note: The base year considered for this report is 2024. Wherever the information is unavailable for 2024, the previous year has been considered.

1.4 STAKEHOLDERS

- Associations, Forums, and Alliances Related to EVs
- Automobile Manufacturers
- Battery Distributors
- Battery Manufacturers
- Charging Infrastructure Providers
- Charging Services Providers
- EV Charging Station Service Providers
- EV Component Manufacturers
- EV Distributors and Retailers
- EV Manufacturers
- Government Agencies and Policymakers

RESEARCH METHODOLOGY

2.1 RESEARCH DATA

The research study involves extensive use of secondary sources such as company annual reports/presentations, industry association publications, magazine articles, directories, technical handbooks, World Economic Outlook, trade websites, technical articles, and databases to identify and collect information on the electric vehicle (EV) market. In-depth interviews have been conducted with various primary sources—experts from related industries, automobile OEMs, EV manufacturers, and service providers—to obtain and verify critical information, as well as assess the growth prospects and market estimations.

FIGURE 2 RESEARCH DESIGN

RESEARCH METHODOLOGY

Key players in the EV market have been identified through secondary research. Primary research interviews have been conducted with key opinion leaders in the automotive sector and the EV industry, such as CEOs, directors, industry experts, and other executives, to validate revenues.

The EV market size, in terms of volume (thousand units) and value (USD billion), for various regions has been derived using forecasting techniques based on the demand for EVs and market trends.

FIGURE 3 RESEARCH DESIGN MODEL

The first step defines the scope of the research study, which includes the EV market by propulsion, vehicle type, component, end use, vehicle connectivity, mild hybrid electric vehicle market by topology, hybrid electric vehicle market by configuration type, plug-in EV market by electric architecture, vehicle body type, vehicle drive type, vehicle top speed, and region to be considered in the study, along with the assumptions and limitations to derive the market numbers. In this step, the approach and the methodology used to arrive at the market size have been defined. This has been followed by primary interviews and model mapping based on the country from the MarketsandMarkets repository.

Both top-down and bottom-up approaches have been followed to derive the market size in terms of volume. The market size has been validated through in-depth interviews with industry experts—excerpts of which are available in the discussion guide in the Appendix—and secondary research. After arriving at the final numbers for the market size, the report-writing phase began.

RESEARCH METHODOLOGY

2.1.1 SECONDARY DATA

Secondary sources referred to for this research study include publications from government sources [such as country-level automotive associations and organizations, Organization for Economic Co-operation and Development (OECD), World Bank, CDC, and Eurostat]; corporate and regulatory filings (such as annual reports, SEC filings, investor presentations, and financial statements); business magazines and research journals; press releases; free and paid automotive databases, The International Energy Agency, EV-volumes, Alternative Fuels Data Center (AFDC), the European Alternative Fuels Observatory (EAFO), and other associations/organizations. Secondary data has been collected and analyzed to arrive at the overall size of the global market, which has been validated by primary research.

2.1.1.1 KEY DATA FROM SECONDARY SOURCES

PARAMETER	SOURCE
 MARKET SIZE (Volume and Value)	- Company Financials - Magazines - Journals - Press Releases - Paid Databases - MarketsandMarkets Data Repository
 REVENUE OF COMPANIES	- Annual Reports - Company Websites - Public Databases - MarketsandMarkets Data Repository
 QUALITATIVE INFORMATION (Market Dynamics, Market Trends)	- Company Websites - Annual Reports - Press Releases - MarketsandMarkets Data Repository
 QUANTITATIVE INFORMATION (Market Dynamics, Market Trends)	- Company Websites - Annual Reports - Press Releases - MarketsandMarkets Data Repository
 VEHICLE LAUNCHES (Market Dynamics, Market Trends)	- Company Websites - Industry Associations - Paid Databases - MarketsandMarkets Data Repository

RESEARCH METHODOLOGY

2.2 DATA TRIANGULATION

After arriving at the overall market size of the global market through the above-mentioned methodology, this market has been split into several segments and subsegments. The data triangulation and market breakdown procedure have been employed, wherever applicable, to complete the overall market engineering process and arrive at the exact market value data for the key segments and subsegments. The extrapolated market data has been triangulated by studying various macro indicators and regional trends from both the demand- and supply-side participants.

FIGURE 4 DATA TRIANGULATION

*MnM KS stands for MarketsandMarkets' 'Knowledge Asset Management' framework. In this context, it stands for an existing market research knowledge repository of over 5,000 granular markets, our flagship competitive intelligence and market research platform "KnowledgeStore", subject matter experts, and independent consultants. MnM KNOW acts as an independent source that helps us validate information gathered from primary and secondary sources.

RESEARCH METHODOLOGY

2.3 RESEARCH LIMITATIONS

- Political structure and policy change may vary in the future, depending upon the circumstances.
- There is a limited number of industry experts available in emerging markets. In such cases, the regional market size has been derived based on the weightage assigned to these markets, based on qualitative insights from global industry experts.
- Quantitative information for some of the market segments has been kept confidential by industry players. Hence, qualitative insights gathered during the study have been used to arrive at the market size of such subsegments.
- Key countries with significant growth in all regions have been considered while calculating the market size.
- The study scope is limited only to the EV market.
- Market numbers in this report have been rounded off. Hence, the country, regional, or other segment totals may vary in this report.
- The EV component, end use, vehicle connectivity, and MHEV topology have been covered qualitatively.
- The HEV configuration type, P-EV electric architecture, vehicle body type, vehicle drive type, and vehicle top speed have been covered in terms of volume (thousand units).
- Two-wheelers, three-wheelers, off-highway vehicles, industrial vehicles, and cargo equipment have not been considered in the scope of this study.
- Certain company figures, such as the number of plants and revenue, are inaccessible because of restrictions by concerned companies. In such cases, the numbers have been estimated based on regional trends, company product portfolios, and secondary and primary sources.
- Key countries with significant EV sales in all regions have been considered while calculating the market size.

TABLE OF CONTENTS

1 INTRODUCTION (PAGE NO. 35)

- 1.1 Study Objectives
- 1.2 Market Definition
- 1.3 Study Scope
 - 1.3.1 Markets Covered and Regional Scope
 - 1.3.2 Inclusions and Exclusions
 - 1.3.3 Years Considered
- 1.4 Currency Considered
- 1.5 Unit Considered
- 1.6 Stakeholders
- 1.7 Summary of Changes

2 RESEARCH METHODOLOGY (PAGE NO. 46)

- 2.1 Research Data
 - 2.1.1 Secondary Data
 - 2.1.1.1 Secondary sources
 - 2.1.1.2 Key data from secondary sources
 - 2.1.2 Primary Data
 - 2.1.2.1 Primary participants
 - 2.1.2.2 Primary interviews from demand and supply sides
 - 2.1.2.3 Breakdown of primary interviews
- 2.2 Market Size Estimation
 - 2.2.1 Bottom-up Approach
 - 2.2.2 Top-Down Approach
- 2.3 Data Triangulation
- 2.4 Factor Analysis
- 2.5 Research Assumptions
- 2.6 Research Limitations
- 2.7 Risk Assessment

3 EXECUTIVE SUMMARY (PAGE NO. 62)

4 PREMIUM INSIGHTS (PAGE NO. 65)

- 4.1 Attractive Opportunities for Players in Plug-in Electric Vehicle Market
- 4.2 Electric Vehicle Market, By Vehicle Type
- 4.3 Electric Vehicle Market, By Propulsion

- 4.4 Plug-in Electric Vehicle Market, By Top Speed
- 4.5 Plug-in Electric Vehicle Market, By Drive Type
- 4.6 Plug-in Electric Vehicle Market, By Electric Architecture
- 4.7 Plug-in Electric Vehicle Market, By Vehicle Body Type
- 4.8 Hybrid Electric Vehicle Market, By Configuration Type
- 4.9 Plug-in Electric Vehicle Market, By Region

5 MARKET OVERVIEW (PAGE NO. 70)

- 5.1 Introduction
- 5.2 Market Dynamics
 - 5.2.1 Drivers
 - 5.2.1.1 Policy support for electric vehicle adoption
 - 5.2.1.2 Reduced operating and maintenance costs
 - 5.2.1.3 Next-generation battery innovations
 - 5.2.1.4 Zero tailpipe and vehicle lifecycle emissions
 - 5.2.1.5 Declining costs of EV batteries
 - 5.2.2 Restraints
 - 5.2.2.1 High initial purchase price
 - 5.2.2.2 Capital-intensive charging infrastructure deployment
 - 5.2.2.3 Battery durability and lifecycle management
 - 5.2.2.4 Geopolitical instability and supply chain disruptions
 - 5.2.3 Opportunities
 - 5.2.3.1 Accelerated investment in charging infrastructure
 - 5.2.3.2 Innovation in wireless and on-the-move charging
 - 5.2.3.3 Fleet electrification and commercial deployment
 - 5.2.3.4 Expansion of Charging-as-a-Service (CaaS) business model
 - 5.2.3.5 Integration of bidirectional charging and smart parking
 - 5.2.4 Challenges
 - 5.2.4.1 Extended charging duration constraints
 - 5.2.4.2 Fragmented charging standards and infrastructure

TABLE OF CONTENTS

6 INDUSTRY TRENDS (PAGE NO. 92)

- 6.1 Regulatory Landscape
 - 6.1.1 Regulatory Bodies, Government Agencies, and Other Organizations
 - 6.1.2 Electric Vehicle Incentives, By Key Countries
 - 6.1.2.1 Netherlands
 - 6.1.2.2 Germany
 - 6.1.2.3 France
 - 6.1.2.4 UK
 - 6.1.2.5 China
 - 6.1.2.6 US
 - 6.1.2.7 Austria
 - 6.1.3 Industry Standards
- 6.2 Sustainability Initiatives
 - 6.2.1 Carbon Impact and Eco-Applications of Electric Vehicles
 - 6.2.1.1 Carbon impact reduction
- 6.3 Certifications, Labeling, and Eco-Standards
- 6.4 Technology Analysis
 - 6.4.1 Key Emerging Technologies
 - 6.4.1.1 Introduction
 - 6.4.1.2 SiC/GaN for power electronics
 - 6.4.1.3 Sodium-ion batteries
 - 6.4.1.4 E-axes and integrated drive units
 - 6.4.1.5 V2X charging
 - 6.4.1.6 V2L
 - 6.4.1.7 Solid-state batteries
 - 6.4.2 Complementary Technologies
 - 6.4.2.1 Battery recycling and 2nd life batteries
 - 6.4.2.2 Internet of Things in electric vehicles
 - 6.4.2.3 Lightweight materials for electric vehicles
 - 6.4.3 Adjacent Technologies
 - 6.4.3.1 Smart grids and microgrids
 - 6.4.3.2 Energy storage systems (ESS) for grid balancing
- 6.5 Technology/Product Roadmap
- 6.6 Patent Analysis
 - 6.6.1 Introduction
 - 6.6.2 Methodology
 - 6.6.3 Document Type
 - 6.6.4 Insights
 - 6.6.5 Legal Status of Patents
 - 6.6.6 Jurisdiction Analysis
 - 6.6.7 Top Applicants
 - 6.6.8 List of Patents
- 6.7 Future Applications
- 6.8 Impact of Ai/Gen Ai on Electric Vehicle Market
 - 6.8.1 Top in-Vehicle Use Cases and Market Potential
 - 6.8.2 Top Manufacturing Use Cases and Market Potential
 - 6.8.3 Best Practices in Electric Vehicle Development
 - 6.8.4 Case Studies of Ai Implementation in Electric Vehicle Market
 - 6.8.5 Interconnected Adjacent Ecosystem and Impact on Market Players
 - 6.8.6 Clients' Readiness to Adopt Generative Ai in Electric Vehicle Market
- 6.9 Success Stories and Real-World Applications
 - 6.9.1 Rivian: Ai for Predictive Maintenance
 - 6.9.2 BMW GROUP: Gen Ai in Purchasing and Digital Experience
 - 6.9.3 VOLKSWAGEN GROUP: Gen Ai and Connected Vehicle Ecosystems
- 6.10 Decision-Making Process for Investment in Ev Market
- 6.11 Key Stakeholders in Buying Criteria
 - 6.11.1 Key Stakeholders in Buying Process
 - 6.11.2 Buying Criteria
- 6.12 Adoption Barriers & Internal Challenges
- 6.13 Ecosystem Analysis
 - 6.13.1 Electric Vehicle Charging Providers
 - 6.13.2 Energy Utility Companies
 - 6.13.3 Software Providers
 - 6.13.4 Battery Manufacturers
 - 6.13.5 Component Manufacturers
 - 6.13.6 OEMs
 - 6.13.7 End Users

TABLE OF CONTENTS

6.13.7.1	Mobility service providers	7.3	Battery Electric Vehicle (BEV)
6.13.7.2	EV fleet operators	7.3.1	Shift to Zero Tailpipe Emission Transport & Government Support to Drive Market
6.14	Supply Chain Analysis	7.4	Fuel Cell Electric Vehicle (FCEV)
6.15	Pricing Analysis	7.4.1	OEM Plans to Reduce Investments to H2 Vehicles and Recent H2 Refueling Station Shutdowns to Reduce Demand
6.15.1	Indicative Selling Price, By Key Battery Electric Vehicle Models, 2024	7.5	Plug-in Hybrid Electric Vehicle (PHEV)
6.15.2	Average Selling Price Trend of Electric Propulsion, 2022–2024	7.5.1	Reduced Fuel Consumption and Emissions to Drive Market
6.15.3	Average Selling Price Trend, By Region, 2022–2024	7.6	Hybrid Electric Vehicle (HEV)
6.16	Trends and Disruptions Impacting Customer Business	7.6.1	Increased Vehicle Mileage with Dual Propulsion to Drive Market
6.17	Investment and Funding Scenario	7.7	Mild Hybrid Electric Vehicle (MHEV)
6.18	Funding By Use Case Application	7.7.1	Low-Cost Electrification Option to Drive Market
6.19	Key Conferences and Events, 2025–2026	7.8	Primary Insights
6.20	Trade Analysis	8	ELECTRIC VEHICLE MARKET, BY VEHICLE TYPE (PAGE NO. 179)
6.20.1	Import Scenario (HS Code 870380)	8.1	Introduction
6.20.2	Export Scenario (HS Code 870380)	8.2	Best-Selling Electric Passenger Cars, 2024
6.21	Case Study Analysis	8.3	Passenger Car
6.21.1	Electric Vehicle Fleets for Public Sector in Vermont, US	8.3.1	Supportive Government Regulations and Subsidies to Drive Market
6.21.2	Frito-Lay Logistics Fleet Electrification	8.4	Commercial Vehicle
6.21.3	Nairobi's Electric Taxi Fleet	8.4.1	Growing Fleet Electrification to Drive Market
6.21.4	Nopiaride Dc Fast Charging Hubs in Kenya	8.5	Key Primary Insights
6.22	Existing and Upcoming Electric Vehicle Models, 2024–2026	9	ELECTRIC VEHICLE MARKET, BY COMPONENT (PAGE NO. 189)
6.23	Total Cost of Ownership	9.1	Introduction
6.24	Bill of Materials Analysis	9.2	Battery Cells and Packs
6.25	OEM Electromobility Progress	9.3	on-Board Chargers
6.25.1	OEM Targets and Investments	9.4	Motors
6.25.2	Regional Plug-in Electric Vehicle OEM Analysis	9.5	Power Control Units
6.25.2.1	Asia Pacific	9.6	Battery Management Systems
6.25.2.2	Southeast Asia	9.7	Fuel Cell Stacks
6.25.2.3	Europe	9.8	Fuel Processors
6.25.2.4	Latin America		
6.25.2.5	North America		
7	ELECTRIC VEHICLE MARKET, BY PROPULSION (PAGE NO. 163)		
7.1	Introduction		
7.2	Best-Selling Electric Vehicle Models, 2024		

TABLE OF CONTENTS

9.9	Power Conditioners	13.5	P3 – Transmission-Side Integration (Shaft-Connected)
9.10	Air Compressors	13.6	P4 – Rear Axle Integration
9.11	Humidifiers		
10	ELECTRIC VEHICLE MARKET, BY END USE (PAGE NO. 202)	14	PLUG-IN ELECTRIC VEHICLE MARKET, BY ELECTRIC ARCHITECTURE (PAGE NO. 221)
10.1	Introduction	14.1	Introduction
10.2	Operational Data	14.2	Vehicle Models, By Electric Architecture
10.3	Private	14.3	400v
10.4	Commercial Fleet	14.3.1	Cost-Effectiveness of 400v Architecture to Drive Market
11	ELECTRIC VEHICLE MARKET, BY VEHICLE CONNECTIVITY (PAGE NO. 205)	14.4	800v
11.1	Introduction	14.4.1	Rising Demand for 350+ Kw Rapid Charging to Drive Market in Luxury Electric Vehicle Segment
11.2	Vehicle-to-Building (V2b)/Vehicle to Infrastructure (V2i)	14.5	Primary Insights
11.3	Vehicle-to-Grid (V2g)		
11.4	Vehicle-to-Vehicle (V2v)	15	PLUG-IN ELECTRIC VEHICLE MARKET, BY VEHICLE BODY TYPE (PAGE NO. 229)
12	HYBRID ELECTRIC VEHICLE MARKET, BY CONFIGURATION TYPE (PAGE NO. 209)	15.1	Introduction
12.1	Introduction	15.2	Suv/Mpv
12.2	Series	15.2.1	Consumer Demand for Spacious, Versatile Vehicles with Large Cargo Area to Drive Market
12.2.1	Rising Demand for Low-Emission Urban Transport and Delivery Fleets to Drive Market	15.3	Sedan
12.3	Parallel	15.3.1	Balance of Efficiency, Comfort, and Performance for Urban and Long-Distance Commuting to Drive Demand
12.3.1	Lower Production Costs and High Efficiency During Highway Cruising to Drive Market	15.4	Hatchback
12.4	Series-Parallel	15.4.1	Affordability, Compact Size, and High Energy Efficiency to Drive Market
12.4.1	Flexible Operation That Switches Power Modes to Optimize Fuel Savings and Performance to Drive Market	15.5	Primary Insights
12.5	Primary Insights		
13	MILD HYBRID ELECTRIC VEHICLE MARKET, BY TOPOLOGY (PAGE NO. 217)	16	PLUG-IN ELECTRIC VEHICLE MARKET, BY VEHICLE DRIVE TYPE (PAGE NO. 236)
13.1	Introduction	16.1	Introduction
13.2	P0–Belt Integration	16.2	Popular Electric Vehicle Models, By Drive Type
13.3	P1 – between Engine and Transmission	16.3	Front-Wheel Drive (FWD)
13.4	P2 – Transmission-Side Integration (Belt-Connected)	16.3.1	Lower Production and Maintenance Costs to Drive Market

TABLE OF CONTENTS

16.4 Rear-Wheel Drive (RWD)

- 16.4.1 Enhanced Weight Distribution Improves Vehicle Balance, Attracting Performance-Focused Consumers

16.5 All Wheel Drive (AWD)

- 16.5.1 Multi-Motor Configurations Enabling Rapid Acceleration and High-Speed Capabilities to Drive Market

16.6 Primary Insights

17 PLUG-IN ELECTRIC VEHICLE MARKET, BY VEHICLE TOP SPEED (PAGE NO. 244)

17.1 Introduction

17.2 Acceleration and Top Speed Benchmarking of Key EV Models

17.3 <110 Mph

- 17.3.1 Urban Commuting and Increased Use of Electric Vehicles in Delivery Fleets to Drive Market

17.4 >110 Mph

- 17.4.1 Rising Demand for Luxury and High-Performance Electric Vehicles to Drive Market

17.5 Primary Insights

18 ELECTRIC VEHICLE MARKET, BY REGION (PAGE NO. 250)

18.1 Introduction

18.2 Asia Pacific

18.2.1 Macroeconomic Outlook

18.2.2 China

- 18.2.2.1 Dominant domestic EV supply chain to drive market

18.2.3 India

- 18.2.3.1 Domestic OEM push for EV innovation and localized manufacturing to drive market

18.2.4 Japan

- 18.2.4.1 Growing preference for dual-propulsion vehicles to drive market

18.2.5 South Korea

- 18.2.5.1 Government incentives and OEM EV targets to drive market

18.3 Southeast Asia

18.3.1 Macroeconomic Outlook

18.3.2 Thailand

- 18.3.2.1 Government plans for 30% EVs by 2030 and growing presence of Chinese budget EVs to drive market

18.3.3 Indonesia

- 18.3.3.1 Government support for domestic EV manufacturing to drive demand

18.3.4 Malaysia

- 18.3.4.1 National Green Technology Policy to drive market

18.3.5 Vietnam

- 18.3.5.1 Strong government support and growing demand for Vinfast to drive market

18.3.6 Singapore

- 18.3.6.1 Surge in electric fleets to drive market

18.3.7 Philippines

- 18.3.7.1 Urbanization and financing trends to drive market

18.3.8 Australia

- 18.3.8.1 Government support and setting of charging stations to drive demand

18.4 North America

18.4.1 Macroeconomic Outlook

18.4.2 US

- 18.4.2.1 Support for local manufacturing of EVs to drive market

18.4.3 Canada

- 18.4.3.1 Government support for clean transportation and zero tailpipe emissions to drive market

18.4.4 Mexico

- 18.4.4.1 Growing setup of Chinese EVs to drive market

18.5 Europe

18.5.1 Macroeconomic Outlook

18.5.2 Germany

- 18.5.2.1 Strong domestic OEM investment in vehicle electrification to drive market

TABLE OF CONTENTS

18.5.3	France		18.6	Middle East
18.5.3.1	Government subsidies and strong domestic OEM EV offerings to drive market		18.6.1	Macroeconomic Outlook
18.5.4	Netherlands		18.6.2	UAE
18.5.4.1	Government incentives and presence of dense supporting infrastructure to drive market		18.6.2.1	Policy incentives and growing EV support infrastructure to drive market
18.5.5	Norway		18.6.3	Saudi Arabia
18.5.5.1	High rate of EV adoption and government policy leadership to drive market		18.6.3.1	Government targets and support for localized manufacturing to drive market
18.5.6	Sweden		18.6.4	Israel
18.5.6.1	Strong government focus for sustainability, tax benefits, and business incentives to drive market		18.6.4.1	Strong incentives and rapid new-tech adoption to drive market
18.5.7	UK		18.7	Latin America
18.5.7.1	ZEV mandates and growing rate of fleet electrification to drive market		18.7.1	Macroeconomic Outlook
18.5.8	Denmark		18.7.2	Brazil
18.5.8.1	Tax breaks on EV registrations and substantial investments in public and private charging infrastructure to drive market		18.7.2.1	Government support for Chinese EV manufacturer setup to drive market
18.5.9	Austria		18.7.3	Colombia
18.5.9.1	Significant private investment in charging infrastructure and strong government subsidies to drive market		18.7.3.1	Increased focus on fleet electrification to drive demand
18.5.10	Switzerland		18.7.4	Chile
18.5.10.1	High environmental awareness and expanding government incentives to drive market		18.7.4.1	Government support for infrastructure development to drive market
18.5.11	Spain		18.7.5	Uruguay
18.5.11.1	Government incentives and strong infrastructure investments to drive market		18.7.5.1	Aggressive subsidies and supportive policies to drive market
18.5.12	Russia		18.7.6	Costa Rica
18.5.12.1	Chinese OEM influx to drive market		18.7.6.1	Government support for EV adoption to drive market
18.5.13	Italy		18.8	Africa
18.5.13.1	Government support through incentives and presence of diverse plug-in and hybrid electric vehicle models to drive market		18.8.1	Macroeconomic Outlook
			18.8.2	Morocco
			18.8.2.1	Strong tax breaks and focus on domestic EV manufacturing to drive market
			18.8.3	Egypt
			18.8.3.1	Rising urbanization and increase in localized EV assembly to drive market
			18.8.4	South Africa
			18.8.4.1	Government incentives and domestic automotive sector transition to drive market

TABLE OF CONTENTS

19 COMPETITIVE LANDSCAPE (PAGE NO. 335)

- 19.1 Introduction
- 19.2 Key Player Strategies/Right to Win, January 2021–July 2025
- 19.3 Market Share Analysis, 2024
 - 19.3.1 Plug-in Electric Vehicle Market Share Analysis, 2024
 - 19.3.2 Hybrid Electric and Mild Hybrid Vehicle Market Share Analysis, 2024
 - 19.3.3 Regional-Level Electric Vehicle Market Share Analysis
 - 19.3.3.1 Asia Pacific
 - 19.3.3.2 Southeast Asia
 - 19.3.3.3 Europe
 - 19.3.3.4 North America
 - 19.3.3.5 Latin America
- 19.4 Revenue Analysis, 2020–2024
- 19.5 Company Valuation and Financial Metrics
- 19.6 Brand/Product Comparison
- 19.7 Company Evaluation Matrix: Key Players, 2024
 - 19.7.1 Stars
 - 19.7.2 Emerging Leaders
 - 19.7.3 Pervasive Players
 - 19.7.4 Participants
 - 19.7.5 Company Footprint
 - 19.7.5.1 Company footprint
 - 19.7.5.2 Region footprint
 - 19.7.5.3 Top speed footprint
 - 19.7.5.4 Vehicle drive type footprint
 - 19.7.5.5 Propulsion footprint
 - 19.7.5.6 Vehicle body type footprint
- 19.8 Company Evaluation Matrix: Startups/SMEs, 2024
 - 19.8.1 Progressive Companies
 - 19.8.2 Responsive Companies
 - 19.8.3 Dynamic Companies
 - 19.8.4 Starting Blocks
 - 19.8.5 Competitive Benchmarking
 - 19.8.5.1 List of startups/SMEs
 - 19.8.5.2 Competitive benchmarking of startups/SMEs

19.9 Competitive Scenario

- 19.9.1 Product Launches
- 19.9.2 Deals
- 19.9.3 Expansions
- 19.9.4 Other Developments

20 COMPANY PROFILES (PAGE NO. 362)

(Business overview, Products/Services/Solutions offered, Recent Developments, MNM view)*

20.1 Key Players

- 20.1.1 BYD COMPANY LTD.
- 20.1.2 TESLA
- 20.1.3 ZHEJIANG GEELY HOLDING GROUP
- 20.1.4 VOLKSWAGEN GROUP
- 20.1.5 GENERAL MOTORS
- 20.1.6 CHANGAN
- 20.1.7 BMW GROUP

SAMPLE PAGES

1 EXECUTIVE SUMMARY

The plug-in electric vehicle market is projected to grow from USD XX.X billion in 2025 to USD XX.X billion in 2035 at a CAGR of XX.X%, and the hybrid electric vehicle market (HEV+MHEV) is set to grow from USD XX.X billion in 2025 to USD XX.X billion in 2035 at a CAGR of XX.X% for passenger car and commercial vehicle segments. The market is driven by increasing vehicle production, stricter emission regulations, and growing consumer demand for sustainable mobility. Government mandates, such as the European Union’s target for all new cars to be zero-emission by 2035, are accelerating adoption. High-selling models like the Tesla Model Y, which crossed XX.X million units in global sales in 2024, demonstrate strong market acceptance. Advancements in battery energy density, charging infrastructure, and thermal management are enhancing vehicle range and performance. Most current EVs, including the Tesla Model 3 and BMW i4, use 400V architecture, which balances cost, performance, and charging infrastructure compatibility. However, OEMs are increasingly exploring 800V architectures to enable faster charging, higher power output, reduced heat generation, and improved efficiency, particularly for high-performance and long-range models. OEM investments in next-generation platforms and partnerships, along with material innovations like lightweight composites, are helping reduce costs and improve efficiency.

FIGURE 1 ELECTRIC VEHICLE MARKET OUTLOOK

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

The revenue mix for the electric vehicle market is shifting significantly, with new revenue sources emerging alongside traditional vehicle sales. Historically, revenue was concentrated in conventional and hybrid vehicle sales, ICE powertrain components, and legacy telematics. However, future growth is expected to be driven by EV motors, thermal management systems, energy management solutions, vehicle software and connectivity, V2X solutions, and service offerings. OEMs such as BYD, Tesla, Geely, General Motors, and CHANGAN are increasingly focusing on EV-specific powertrains, range and efficiency improvements, and integrated software solutions. Tier 1 component providers like Continental AG, Faurecia, Denso, Valeo, and Robert Bosch GmbH are developing lightweight and modular components, multi-system integration, and V2X or service-based offerings. The adoption of EV technologies, combined with the rising consumer demand for higher efficiency and connected mobility, is expected to drive revenue growth. Emerging markets, particularly in the Asia Pacific, are projected to see strong EV adoption due to supportive

government policies, charging infrastructure expansion, and increasing consumer interest in sustainable mobility solutions.

FIGURE 2 PLUG-IN ELECTRIC VEHICLE MARKET, BY REGION, 2025–2035

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

The Asia Pacific is set to be the largest plug-in EV market during the forecast period, led by China's dominant share and rapid growth. In 2025, EVs are estimated to account for nearly XX% of new car sales in China, supported by government incentives, charging infrastructure expansion, and partnerships between OEMs like BYD and NIO and battery suppliers such as CATL. Economies of scale and advanced manufacturing are driving down costs, making EVs more accessible across segments. Other countries are pursuing ambitious targets, with India aiming for XX% EV penetration by 2030. Subsidies, tax exemptions, and emission mandates are accelerating adoption. With investments from companies like BYD, Geely, Hyundai, CHANGAN, SAIC Motors, and Volkswagen, as well as battery and component manufacturers such as LG Energy Solution and Panasonic, and a strong push to reduce urban pollution and meet carbon neutrality goals, the Asia Pacific region is the global leader in EV demand and production.

BEV is emerging as the largest propulsion type in the EV market, driven by rising consumer demand, supportive policies, and expanding charging infrastructure. The prices of EV batteries are decreasing due to advances in technology, which are expected to result in the reduced overall prices of BEVs. The PHEV segment is expected to grow, with countries such as Japan, China, the US, Germany, and France witnessing higher demand over time. Series hybrid HEVs are also expected to grow in demand across Europe, with regulations supporting incentives for vehicles with a primary electric motor.

FIGURE 4 KEY PLAYERS IN ELECTRIC VEHICLE MARKET

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

Major players in the global EV market include BYD Company Ltd. (China), Tesla (US), Zhejiang Geely Holding Group (China), Volkswagen Group (Germany), and General Motors (US). These companies adopt various strategies to sustain and expand their market positions, including model launches, technological innovations, and strategic partnerships. EV manufacturers maintain competitiveness by enhancing battery performance, expanding charging infrastructure, and integrating advanced software for energy management, range optimization, and connected services. They also leverage AI-driven telematics, OTA updates, and IoT-enabled vehicle monitoring to improve user experience and fleet efficiency.

The global plug-in electric vehicle market is moderately consolidated, with the top five players holding XX%-XX% of the total market share. BYD focuses on vertically integrated production and domestic dominance in China while expanding overseas through EV exports and joint ventures. Tesla emphasizes its global charging network, OTA software updates, and energy ecosystem integration to maintain leadership across regions. Zhejiang Geely leverages its portfolio of EV brands and partnerships with international OEMs to scale production and technology adoption. Volkswagen Group invests in modular EV platforms and global electrification programs, while General Motors prioritizes battery innovation and mass-market EV models for North America. The remaining XX%-XX% of the market is shared among regional and emerging players, creating opportunities for innovation, niche offerings, and new market entrants.

2 PREMIUM INSIGHTS

2.1 ATTRACTIVE OPPORTUNITIES FOR PLAYERS IN PLUG-IN ELECTRIC VEHICLE MARKET

3 MARKET OVERVIEW

3.1 MARKET DYNAMICS

FIGURE 6 ELECTRIC VEHICLE MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

DRIVERS	▪ Policy support for EV adoption ▪ Reduced operating and maintenance costs ▪ Next generation battery innovations ▪ Zero tailpipe and vehicle lifecycle emissions ▪ Declining costs of EV batteries
RESTRAINTS	▪ High initial purchase price ▪ Capital-intensive charging infrastructure deployment ▪ Battery durability and lifecycle management ▪ Geopolitical instability and supply chain disruptions
OPPORTUNITIES	▪ Accelerated investment in charging infrastructure ▪ Innovation in wireless and On-the-Move charging ▪ Fleet electrification and commercial deployment ▪ Expansion of Charging-as-a-Service (CaaS) business model ▪ Integration of Bidirectional charging and smart parking
CHALLENGES	▪ Extended charging duration constraints ▪ Fragmented charging standards and infrastructure

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

3.1.1 DRIVERS

3.1.1.1 Policy support for electric vehicle adoption

Countries around the world have set targets to reduce vehicle emissions by 2035. They have started promoting the development and sales of EVs and related charging infrastructure. For instance, according to the Natural Resources Defense Council, automotive companies in the US have announced USD XX billion in investments in the EV industry to promote EV infrastructure, such as charging stations. Several governments are providing various incentives, such as low or zero registration fees and exemptions from import taxes, purchase taxes, and road taxes for the adoption of EVs.

4 PLUG-IN ELECTRIC VEHICLE MARKET, BY VEHICLE BODY TYPE

KEY FINDINGS

- The plug-in electric vehicle market for the SUV/MPV segment is projected to grow at a CAGR of XX.X% during the forecast period, from XX.X million units in 2025 to XX.X million units by 2035.
- The sedan segment is expected to grow from XX.X million units in 2025 to XX.X million units by 2035 at a CAGR of XX.X%.
- The market for the hatchback segment is estimated to be XX.X million units in 2025 and is projected to reach XX.X million units by 2035 at a CAGR of XX.X%.
- Hatchbacks cater to urban and cost-conscious buyers with their compact size, ease of parking, and affordability. Their practicality and efficiency make them attractive for city commuting and short-range travel.
- Sedans are gaining market share in the luxury and performance segments. Automakers are launching new models that appeal to consumers who want a premium driving experience.

4.1 INTRODUCTION

The electric vehicle market is witnessing varied growth across different vehicle body types, with SUVs/MPVs, sedans, and hatchbacks each addressing distinct consumer needs and regional preferences. SUVs and MPVs are expanding rapidly, especially in North America, Europe, and China, where consumers prioritize space, safety, and longer driving ranges for family and leisure use. Sedans remain popular in developed and emerging markets alike, offering a blend of performance, comfort, and efficiency suited for both daily commuting and longer trips. Hatchbacks are seeing robust growth in dense urban areas across Asia and Europe, where affordability, compact design, and energy efficiency are key considerations. Leading EV models such as the Tesla Model Y, BYD Song, Hyundai Kona, and Nissan Leaf are driving demand in their respective segments, supported by improvements in battery technology, wider charging infrastructure, and government incentives. Together, these body types are shaping the EV market's expansion by catering to diverse customer expectations, driving innovation, and enhancing accessibility across regions.

Source: Secondary Research, Industry Associations, Interviews with Experts, and MarketsandMarkets Analysis

The SUV/MPV segment is expected to witness the fastest growth in the electric vehicle market over the forecast period, driven by rising consumer preference for spacious, versatile, and tech-rich vehicles. Increasing urbanization and family-focused mobility needs are boosting demand for EVs that offer higher seating, larger cargo space, and advanced safety features. Strong range and battery performance in larger EVs allow these vehicles to compete effectively with ICE counterparts, while the rising availability of fast-charging networks supports longer trips. Popular models contributing to growth include Tesla Model Y, BYD Tang, Hyundai Ioniq 7, Kia EV9, and Mercedes EQB. In 2025, Hyundai launched the Ioniq 7 in South Korea with an estimated range of over 400 miles, while Kia introduced the EV9 in the US, reflecting OEM efforts to meet growing SUV/MPV EV demand. This combination of consumer appeal, improved infrastructure, and new model launches is driving rapid adoption in the segment.

4.2 SUV/MPV

4.2.1 CONSUMER DEMAND FOR SPACIOUS, VERSATILE VEHICLES WITH LARGE CARGO AREA TO DRIVE MARKET

SUV/MPVs are larger multi-purpose vehicles designed for families and long-distance comfort, combining higher seating positions, spacious interiors, and versatile cargo capacity. These vehicles are particularly popular in North America, China, and Europe, where consumers prioritize practicality, ride comfort, and all-weather performance. Larger battery packs in SUV/MPV EVs support extended range, while advanced suspension systems and aerodynamics improve ride quality and handling compared to smaller EVs. SUV and MPV EVs often incorporate dual-motor or AWD configurations to enhance traction, stability, and acceleration. Key models driving growth include Tesla Model Y, BYD Tang, Volkswagen ID.6, Mercedes EQB, and NIO ES8, which have been among the best-selling SUV EVs in 2024 and early 2025. OEMs are increasingly focusing on high-tech features such as adaptive cruise control, enhanced infotainment, and thermal management systems to appeal to both family and premium buyers, further cementing this segment's dominance in global EV sales.

Total	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX.X%

Source: Secondary Research, Industry Associations, Interviews with Experts, and MarketsandMarkets Analysis

The SUV/MPV segment is expected to hold a significant share in the Asia Pacific EV market over the forecast period. This increase in SUV/MPV demand is due to increasing urbanization, higher disposable incomes, and a growing demand for spacious and family-friendly vehicles. Improved battery capacity and powertrains are helping boost range and efficiency, while affordability and practicality are making these vehicles more appealing. In 2025, new models like Hyundai's Ioniq 9, Kia's EV9, Volkswagen's ID.CROSS, and VinFast's VF7 are being launched, offering more options for families and city drivers, and supporting the region's robust growth in the adoption of EVs.

4.3 SEDAN

4.3.1 BALANCE OF EFFICIENCY, COMFORT, AND PERFORMANCE FOR URBAN AND LONG-DISTANCE COMMUTING TO DRIVE DEMAND

Sedans are mid-sized passenger vehicles designed for efficiency, comfort, and style, widely favored in Europe, North America, and China. They offer an optimal balance of battery range, energy efficiency, and driving dynamics, with aerodynamic designs that reduce energy consumption compared to larger SUVs. Sedans typically cater to daily commuting and urban mobility needs while providing premium interiors,

advanced driver-assistance systems, and smooth ride quality. Leading models include Tesla Model 3, BYD Han, BMW i4, NIO ET5, and Mercedes EQE, which have achieved strong sales in 2024 and 2025 due to their combination of performance, affordability, and technological sophistication. Sedans are also the preferred choice for fleet operators and consumers seeking a blend of driving comfort, practicality, and lower total cost of ownership, supporting continued segment growth across key EV markets.

TABLE 5 SEDAN: PLUG-IN ELECTRIC VEHICLE MARKET, BY REGION, 2021–2024 (THOUSAND UNITS)

Region	2021	2022	2023	2024	CAGR (2021–2024)
Asia Pacific	XX,XX	XX,XX	XX,XX	XX,XX	XX.X%

Total	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX,XX	XX.X%

Source: Secondary Research, Industry Associations, Interviews with Experts, and MarketsandMarkets Analysis

The sedan segment is expected to see the fastest growth in Southeast Asia over the forecast period, supported by increasing demand for stylish, comfortable, and tech-enabled vehicles. Rising middle-class incomes and better road infrastructure are encouraging more buyers to choose sedans for daily commuting and long drives. Enhanced aerodynamics, lightweight designs, and improved battery efficiency are helping sedans offer longer range and better performance. In 2025, popular models like the Hyundai Ioniq 6, BYD Seal, and Toyota bZ4X are expanding choices in the region, attracting consumers looking for premium features, safety, and energy-efficient transportation. This is helping sedans play a key role in the region's EV market growth.

5 ELECTRIC VEHICLE MARKET, BY REGION

5.1 NORTH AMERICA

The North American electric vehicle market is experiencing explosive growth driven by a confluence of factors. Environmentally conscious consumers are increasingly opting for EVs due to lower emissions and running costs. Government incentives at both the federal and state levels are making EVs more affordable. Automakers are rapidly expanding their EV offerings, catering to a wider range of needs and budgets. This surge in interest is evident in the rise of EV sales. Major players like Tesla, General Motors, Ford, and Stellantis are at the forefront of this revolution, each launching innovative new electric vehicles. From the ever-popular Tesla Model 3 to the recently unveiled Ford F-150 Lightning electric truck, there is an EV option for nearly every driver.

As charging infrastructure continues to expand and battery technology improves, range anxiety is becoming less of a concern. This, coupled with the ongoing focus on sustainability, is paving the way for a future where EVs become the dominant force on North American roads.

Top EV battery providers and startups have partnered with OEMs. GM, for instance, has partnered with LG Chem to produce its EV batteries. Stellantis, on the other hand, has partnered with Samsung SDI for EV batteries. Ford is working with SK Innovation. BMW, Nissan, Volkswagen, and Daimler are the leading OEMs in the US. The top-selling EVs in the US are the Tesla Model S, Chevy Volt, Nissan Leaf, and Ford Fusion Energy PHEV. Various services offered by EV infrastructure providers have increased the adoption rate of EVs in the US. ChargePoint, a leading infrastructure service provider in the US, allows its users to book dedicated time slots for charging EVs. These services have reduced the range of anxiety for EV owners. In the near future, various initiatives by governments and policymakers are expected to boost the demand for EVs in the region.

The US is among the top electric vehicle markets in the world. Although the country does not have unified EV-related regulations, 45 of its states promote the sales of EVs and the setting up of EV charging stations. To a certain extent, the country gives a USD XX,XX grant to new EV buyers. States such as California have mass-popularized EVs and taxed ICE vehicles significantly. This has led to a case where some states are fully EV-enabled and ready in the country, while others are not. The US has also announced a regulation to increase the electric vehicle market share to XX% by 2030 and asked OEMs to start preparing for an all-electric future.

Canada is also working to increase EV demand. Relevant laws are being made to support Canadian EV manufacturers and promote demand in the domestic market.

Source: Secondary Research, Interviews with Experts, and MarketsandMarkets Analysis

The North American region is one of the most well-established electric vehicle markets in the world. Countries such as the US and Canada have a high demand for EVs across some of their states. The region is also home to many top EV manufacturers, such as Tesla, General Motors, and Ford. These companies have worked together to cater to the EV demand in the region along with other foreign players. The US and Canadian governments are taking initiatives to develop the EV infrastructure for faster electrification. For instance, in July 2024, Canada's Minister of Energy and Natural Resources announced federal investments in two organizations to install 660 Level 2 EV chargers across Nova Scotia, Canada: USD XX million to Polycorp Group of Companies (Canada) to install 634 Level 2 chargers at 9 multi-unit residential buildings across and USD XX to 292 Main Street Developments Limited to install 26 Level 2 chargers across the province.

5.1.1 CANADA

5.1.1.1 Government support for clean transportation and zero tailpipe emissions to drive market

Canada's EV market is rapidly growing over the years, with BEVs and PHEVs surpassing XX% of new light-duty vehicle sales in 2024 compared to XX% in 2023, and projected to climb rapidly under federal and provincial mandates. The federal government has set a zero-emission vehicle (ZEV) sales target requiring XX percent of new vehicle sales to be electric by 2026, XX percent by 2030, and XX percent by 2035. Consumer uptake is driven by national incentives under the iZEV program, provincial rebates in markets such as Quebec and British Columbia, and an expanding charging infrastructure supported by Natural Resources Canada's Zero-Emission Vehicle Infrastructure Program.

The competitive landscape is shaped by a mix of international OEMs and domestic manufacturing investments. Tesla continues to lead sales, followed by Hyundai, Kia, Ford, and Volkswagen in the passenger EV space. Recent investment announcements from Stellantis, LG Energy Solution, and Volkswagen to build large battery manufacturing facilities in Ontario position Canada as a key part of the North American EV supply chain. In addition, Canada's mineral resources, particularly lithium, nickel, and cobalt, are central to long-term supply security, prompting federal initiatives to align critical mineral development with automotive and battery production.

Federal and provincial governments are not only incentivizing adoption but also investing in infrastructure expansion. Canada is developing coast-to-coast charging corridors, with targets of 84,500 public chargers by 2029, compared to fewer than 30,000 available in 2024. The government is also focusing on medium- and heavy-duty fleet electrification, providing incentives for commercial operators to adopt ZEVs, and aligning emissions standards with those of the US EPA to ensure regulatory harmonization across North America. This dual approach of demand stimulation and supply chain localization underpins the country's EV strategy.

In Canada, BEVs are the fastest-growing, supported by charging expansion and falling costs. PHEVs maintain a solid share, especially among consumers outside major urban centers where charging access is less reliable. Conventional hybrids remain competitive due to lower upfront cost and fuel savings, but are not central to Canada’s long-term ZEV policy. Automotive OEMs are investing heavily in the EV supply chain in the country. For instance, in April 2024, Honda announced the largest automotive investment of USD XX billion (Can\$XX billion) in the country for a massive new EV battery and vehicle assembly plant. The EVs will start rolling off the assembly line in 2028. Similarly, in April 2023, Volkswagen announced plans to open its largest Gigafactory in Ontario, Canada, as part of its ambitious EV strategy in North America. The battery company, Powerco SE, will invest up to USD XX.X billion by 2030 to establish the Gigafactory, with an annual production capacity of up to XX GWh in its final expansion phase.

6 COMPETITIVE LANDSCAPE

6.1 COMPANY EVALUATION MATRIX: KEY PLAYERS, 2024

The micro-quadrants in this section provide information on the major players in the EV market, outline the findings, and analyze how well each market player performs within the predefined micro-quadrant criteria. Vendor evaluations are based on two broad categories: product footprint and market share/rank. Each category carries various criteria based on which vendors are evaluated. The evaluation criteria considered under product footprint include the breadth and depth of offerings, product features, functionality, and focus on product innovations and branding. The evaluation criteria considered under market share/rank includes the overall revenue and growth rate of companies (past five years), regional presence (based on geographic presence and presence in emerging markets), effectiveness of growth strategies—organic and inorganic (product developments, deals, and expansion), vision alignment, channel strategy, and fit. The analysis is derived using the weighted average method.

FIGURE 9 COMPANY EVALUATION MATRIX (KEY PLAYERS), 2024

Note: This analysis is based solely on the performance and presence of companies in the plug-in electric vehicle segment.

7 COMPANY PROFILES

7.1 KEY PLAYERS

7.1.1 BYD COMPANY LTD.

7.1.1.1 Business overview

BYD Company Ltd., known as BYD (Build Your Dreams), is a leading technology company with a significant presence in the electronics, automobiles, and new energy sectors. It is among the largest electric vehicle (EV) manufacturers in the world. It operates through two major segments: automobiles & related products, and other products; and mobile handset components, assembly service and other products.

BYD Auto is a subsidiary of BYD Company. It is mainly involved in the EV, battery, and electric charging businesses. The company produces automobiles, buses, electric bikes, electric cars, forklifts, rechargeable batteries, and trucks. It offers a wide range of electric and hybrid vehicles and sells primarily in the Chinese market. The company has a presence in over 70 countries, including China, the US, India, and Europe. Some of its best-selling EVs include Song, Han, and Tang. In 2024, BYD sold around XX.X million battery electric vehicles. The majority of its sales were reported from China. In November 2024, the company introduced its SEALION 7 SUV in Europe.

ABOUT MARKETSANDMARKETS™

MarketsandMarkets™ Is the World's Largest Revenue Impact Company, Serving Over 7500 Customers. 80% of top 2000 Companies Globally Rely on Us for Identifying New High Growth and Niche Revenue Opportunities.

In the Face of Constant Technology innovation and Market Disruption, We Help Organizations Plan and Operationalize their Future Revenue Mix Decisions By Identifying Over 30,000 High Growth Opportunities Ranging From \$1B to \$500B Across 90+ industry Trends and Markets. Organizations Choose MarketsandMarkets™ to Stay Ahead of the Curve and Accelerate their Revenue Decisions and Implementations By 6 – 12 Months, Giving them A Unique, First-mover Advantage.

Our Revenue Impact Methodology Provides Quantified and Actionable insights on Converged, Granular and Connected Market Eco-systems That Result From Disruptive Technologies and High-growth Markets. We Provide An Extended Lens on Not only What Will Impact Our Client's Revenue But Also What Will Impact their Clients' Revenues, Continually Uncovering Latent Opportunities.

We Work Across All Major B2B industries With C-level Executives in Functions Such As Strategy, Marketing, Sales, R&D, Product, and M&A. MarketsandMarkets™ Brings Exclusive High-growth Markets intelligence Generated By Over 850 SMEs and Analysts Along With Its Proprietary Revenue Impact Platform (Knowledge Store).
